The Babylonian Talmud tells us there were 48 prophets and **7 prophetesses** who were active in Israel in biblical times! Our study will feature the Women: an exploration of the primary biblical accounts of their contribution to the Jewish redemption narrative. We will also review encounters/ conversations Jesus had with women as recorded in the Gospels.

They each **knew something** of God's will for the future and celebrated in our Hebrew tradition as stalwart characters of intelligence, creativity, and faithfulness who God used to move salvation history forward.
