

DIRECTIONS FOR PRODUCING CARDS

1) Obtain desired 8 ½" x 11" white paper

Use good quality, heavy stock paper – either cover stock or card stock (typically ~ 67#)
Please DO NOT use regular (20#) copy paper.

Quality, heavy paper helps provide a more meaningful card

2) Select desired pages from Christmas card images file or select entire file to obtain a variety of designs.

3) Print selected pages on a color printer, if possible, however many copies desired. Two cards will be generated per each page.

4) Cut each page in half to generate the two cards per page. Fold each card in half to produce finished card.
